

A Seminar Report on

Advanced Automation in Agriculture - Lateral Move Irrigation Machines

By

Ms. Mrunalini Vijay Patil

Guided by

Prof. Rahul Rakhade

Department of Mechanical Engineering

K.K.Wagh Institute of Engineering Education Research

2018-19

KKWIEER, Department of Mechanical Engineering

K.K.Wagh Institute of Engineering Education Research

CERTIFICATE

This is to certify that **Ms. Mrunalini Vijay Patil**, has successfully completed the Seminar work entitled **Advanced Automation in Agriculture - Lateral Move Irrigation Machines** under my supervision, in the partial fulfilment of Bachelor of Engineering - Mechanical Engineering, by the University of Pune.

Date:

Place:

PROF. RAHUL RAKHADE,
GUIDE

PROF. MILIND MURUGKAR,
HOD, MECHANICAL

EXTERNAL EXAMINER

PROF.(DR.) K. N. NANDURKAR
PRINCIPAL, KKWIEER

SEAL

KKWIEER, Department of Mechanical Engineering

Acknowledgement

First of all, I am very thankful to my institute K.K.Wagh Institute of Engineering Education Research - KKWIEER for providing me a wonderful opportunity to work towards this seminar report. Secondly, I am very thankful to my mentor Prof. Rahul Rakhade for guiding me during each step of seminar execution work. I am grateful of my subject teachers and parents for their guidance and support throughout the learning period.

I am also thankful to Dr. PQR from Mechanical Engineering Departments, and Prof, ABC from GHI,India for guiding me towards the blahblah blahblah blahblah blahblah blahblah .

List of Figures

1	Here Goes Your Figure's Caption.	9
---	--	---

List of Tables

Nomenclature

A = nozzle cross-sectional area

H = nozzle height

M = Mach number

NPR = nozzle pressure ratio, P_0/P_a

P = pressure

P_0 = total pressure at the nozzle inlet

T = temperature

u,v,w = velocity components

x = axial direction

y = normal direction

γ = ratio of specific heats

θ = flow angle

μ = viscosity

φ = shock angle

a = ambient

c = centerline

e = nozzle exit

t = throat

Contents

1	Introduction	6
1.1	Scope & Methodology	6
2	Literature Review	7
3	Case study	8
4	A Sample Section	9
4.1	Title of Sample Subsection	9
5	Conclusion	10
6	Future Work	11

Abstract

ABSTRACT OF YOUR SEMINAR WORK GOES HERE

1 Introduction

INTRODUCTION OF YOUR SEMINAR WORK GOES HERE

1.1 Scope & Methodology

YOUR SEMINAR WORK GOES HERE

2 Literature Review

The review should be conducted from at least five research papers published during last five year.

YOUR SEMINAR WORK GOES HERE

3 Case study

YOUR SEMINAR WORK GOES HERE

4 A Sample Section

4.1 Title of Sample Subsection

For a figure sample with caption and proper reference, see Figure 1 as adopted from[1]. The figure number and reference numbers are automatically generated in a chronological order by L^AT_EX.

Figure 1: Here Goes Your Figure's Caption.

A sample equation is written as:

$$F_m = \frac{dm}{dt} v_e = \dot{m} v_e \quad (1)$$

where \dot{m} is the mass flow rate and v_e is the exit or exhaust velocity of the propellant.

Another sample equation can be expressed as

$$F_m = \dot{m} v_e + (P_e - P_a) A_e \quad (2)$$

where p_e and A_e are the pressure and cross section area at the nozzle exit, and p_a is the ambient pressure.

5 Conclusion

CONCLUSION, IF ANY.

6 Future Work

FUTURE WORK, IF ANY
